

I am not a lawyer. I am a small business owner.  
My concern is that those who fax their ads incessantly often  
do not put a valid business name or fax phone number  
on the fax as they should.  
I get almost as much spam faxes as solicited faxes.  
Also, we find it futile to call the numbers they provide in order to be removed  
from their databases.  
We're put back on some other database instantly.  
Hopefully, the FCC knows all the tricks this trade employs.  
Thank you for your efforts to curb this problem.
